Note: ACS 1-year, 3-year and 5-year estimates are period estimates, which means they represent the characteristics of the population over a specific data collection period. Sample survey data are combined to produce 12 months, 36 months or 60 months of data. These are called 1-year, 3-year and 5-year data. For sampling methodology and margin of error information refer to the Census Bureau website at www.census.gov
